Power BI Advanced

TRAINING WORKSHOP

DATA BEAR

Be Data Savvy

Empower Your Organisation Through Compelling Data Story-Telling

Microsoft Solutions Partner

Data & AI

Access the information you need when you need it through visually stunning dashboards and reports

Be empowered to drive effective business change through data driven solutions. Create interactive reports, discover insights and share your findings throughout your organisation.

What to Expect?

The Power BI Advanced course is designed for data analysts and report authors who have completed our Power BI Foundations course and want to further enhance their skills in Power BI. This instructor-led, 2-day course delves into advanced concepts and techniques that empower learners to create highly effective reports, analyse complex data, and optimise their Power BI workflow. Participants will gain in-depth knowledge of that will empower them to take their Power BI reports to the 'Next Level'

What do I need for Remote Online Training?

- Windows OS Laptop with a recent version on Power BI Desktop installed.
- Good Internet connection
- A second screen or an additional device (e.g. a tablet)
- A headset or built-in speakers and microphone

Duration:
Two days (14 hours)
9:30 am - 4:30 pm
(each day)

Prices:
Public Live Online Class
£716 +VAT
per delegate

Public Onsite Class
£1,295 +VAT
per delegate

Private Training Prices

Private training is quoted as a fixed total fee based on group size.
For private bookings, we only charge for the first 5 delegates, so delegates 6 to 10 are included at no additional cost.
Current private course pricing is available on our website, or can be shared on request.

Objectives

Learn:

- Advanced Analytics and What-if Analysis
- Enhanced Data Visualization and Storytelling
- Further Calculations with DAX
- Filter Contexts with DAX
- Dynamic Visuals and Bookmarking
- Next Level Transformations and Query Techniques
- Live Connect and External Data Integration
- Cloud Service Admin & Next Level Dashboards
- Next Level Security and Governance
- Best Practices and Future Directions
- Calculation Groups
- Visual Level Calculations

Who is it For?

- Those who have completed the Power BI Foundations course and want to advance their skills.
- Professionals already working with Power BI who want to gain deeper insights into advanced concepts and techniques.
- Individuals seeking to enhance their ability to create impactful reports, perform complex data analysis and optimise their Power BI workflow.

About us

As a Microsoft solutions partner in Data Analytics and a Power BI partner, with a vertical focus on helping business become more data efficient through Power BI training and consulting, Data Bear has an established record of empowering originations with the skills and tools needed to drive their business further. Using latest technologies and best practice, the Data Bear team is dedicated to providing training and solutions that ultimately save time, increase profits and reduce stress.

Course Content

Day 1

Data Import and Connection Techniques

- Data source settings & adjustments
- Create & manage query parameters
- Advanced ETL Processes
- Working with multiple fact tables
- Connecting to APIs for online data integration
- Referencing queries for complex data manipulations
- Combining files from a folder to streamline processes
- Accessing internet databases for enriched data analysis

Data Modelling for Improved Performance

- Creating conditional columns
- Using columns from examples
- Merging and appending queries
- Building a star schema from a flat file
- Overcoming layout limitations with custom mapping
- Tips for query error Handling
- Column profiling and distribution
- Extracting & replacing text
- Pivoting & unpivoting columns

Power BI Bookmarks

- Understanding the Value Offering
- Using Bookmarks for Presentations
- How to use Bookmarks to Enhance the Visual Story
- Switching Between Chart Types
- Use Buttons or Images with Bookmarks
- Consolidating Report Views onto a Single Page
- Other Use Cases

Dynamic Analytics & What-if Analysis

- Concepts and applications of parameters
- Building what-if analysis reports for scenario planning
- Utilising numeric parameters for dynamic slicing
- Leveraging calculated tables to support calculations
- Capture Slicer Selections with DAX
- DAX: 'GENERATESERIES' & 'SELECTEDVALUE'
- Working with Error Bars

DAX: Understanding Core Concepts

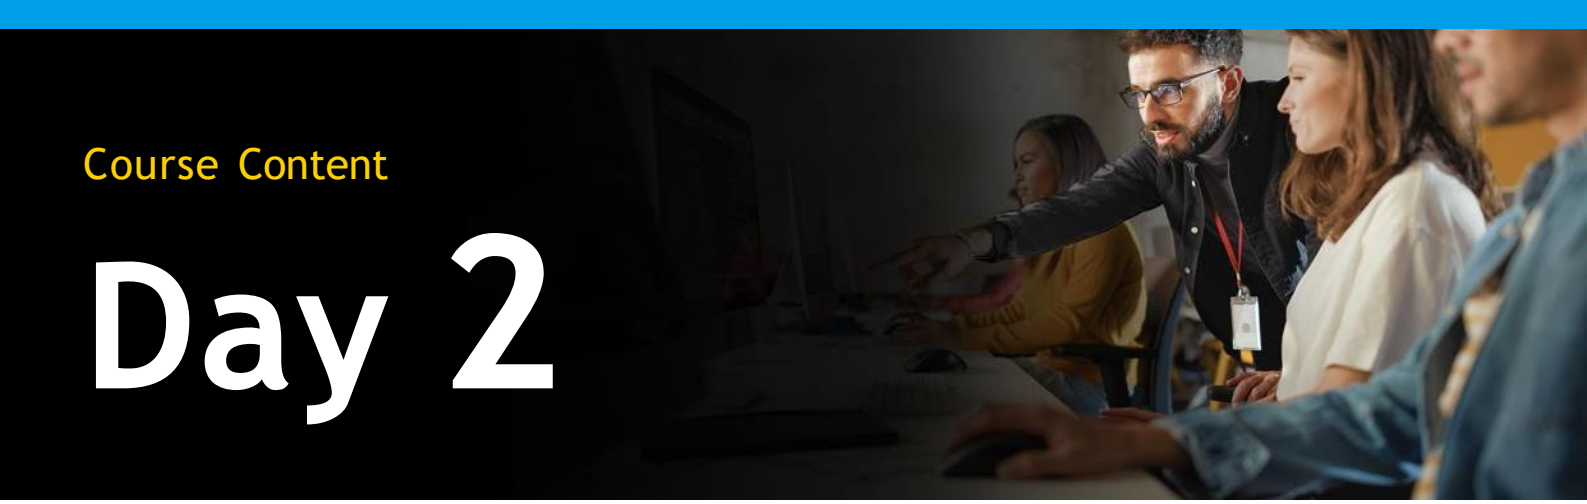
- Creating calculated columns & tables
- Understanding row context
- Unravelling the filter context
- Referencing measures inside a metric
- Leveraging the calculate function
- Dynamically modifying the filter context
- Implementing Time Intelligence functions
- Referencing inactive relationships in the data model
- Using DAX iterating functions

Report Page Tooltips

- Creating a tooltip report page
- Configuring & designing a tooltip page
- Using tooltip reports with drill-through pages
- Adding tooltip reports to the visual header
- Using tooltips with buttons
- Using multiple tooltip reports on the same page

Course Content

Day 2



Dynamic Switching of Measures & Dimensions Inside of Visuals

- Concepts and application of field parameters
- Utilising field parameters for flexible analysis
- Switching the comparison metric
- Switching between multiple measures
- Synching multiple field parameters
- Switching dimensions in visuals
- Creating dynamic headers for interactivity
- Adding dynamic subtitles to reports
- Using field parameters with drilldowns

Next Level DAX Techniques

- Debugging DAX functions with variables
- Streamline DAX Code with variables
- Understanding DAX calculation groups
- Understanding DAX Filter Context
- Modifying the Filter Context
- Ignoring the Filter Context
- Using DAX HASONEVALUE
- Using relative date filters
- Using top & bottom N filters
- Using the DAX query editor
- Creating DAX measures in the cloud service

DAX Calculation Groups

- Creating statistical calculation groups
- Creating Time Intelligence calculation groups
- Leveraging calculation groups with inactive relationships
- Creating additional calculation items
- Adding a dynamic format string to a calculation item
- Using calculation items in reports
- Using calculation items in measures
- Setting calculation group precedence

Visual Calculations to Streamline DAX

- Understanding visual calculations
- Replacing complex DAX calculation with simplified visual calculations
- Considerations associated with visual calculations

Live Connect and External Data Integration

- Connecting to and Managing Power BI Data Flows
- Understanding Direct Query
- Connecting to Power BI Data Sets (Live Connect)
- Using Power Query in the cloud service

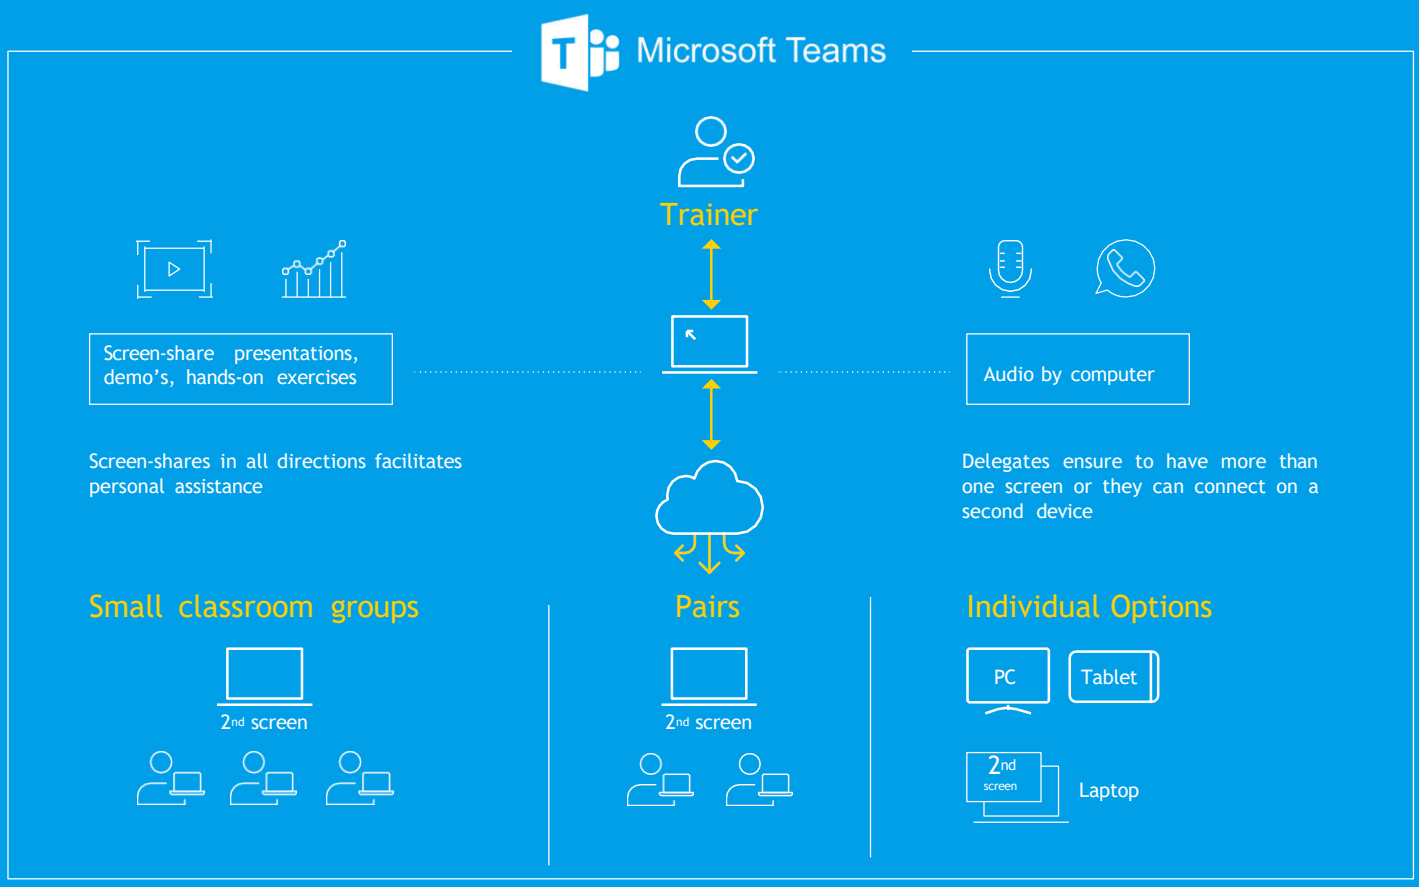
Security and Governance

- Implementing dynamic row-level security
- Mapping user IDs to the data model for personalized access
- Utilising DAX functions for returning usernames
- Assigning users to Power BI security roles for controlled access

Using Power BI Metrics & Scorecards

- Getting started with Power BI Metrics
- License requirements and limitations
- Exploring the Metrics Hub page
- Changing the score view
- Create a scorecard and a manual metric
- Staying on top of and follow your metrics
- Create a custom status on your scorecards

Remote Live Online Training



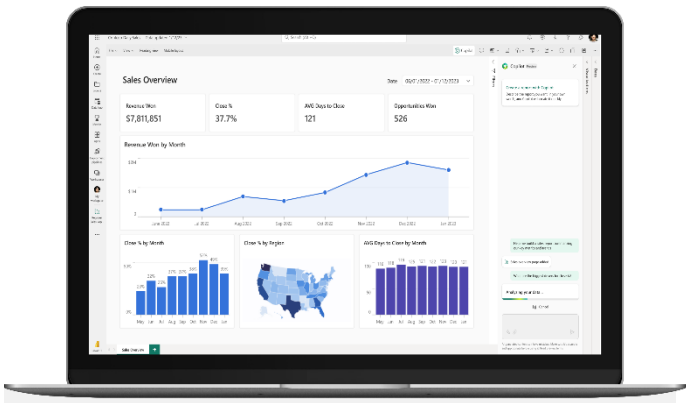
- Using Microsoft Teams, a video conference with screen and audio sharing will be made available for all delegates
- You can connect using Microsoft Teams, or if you don't have access to Teams, you can connect through any internet browser
- The trainer's screen and audio will be shared with all delegates
- If needing assistance, you can share your screen with the trainer
- At any time during the training you can unmute your microphone to ask questions, or for further clarification
- Allowing for simultaneous display of both the trainers screen and your own, it is highly recommended that you have either a second screen or an additional device, e.g. 10"+ Tablet.
- All required training files and the training manual will available for download through Teams

Microsoft GoldPartner DATA ANALYTICS

MCT 2019 - 2020

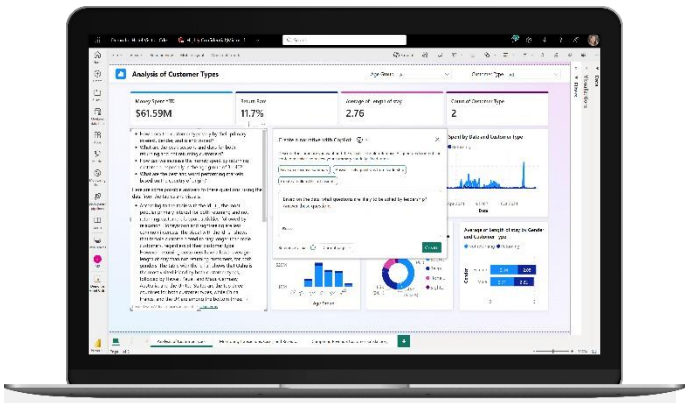
Join Using Two Screens

To ensure efficiency, the use of **two screens** is required. One of your two screens displays the trainer's presentation. Having two screens empowers you with a clear view of what the Trainer is explaining and your own working examples as you follow along.



Trainer's Screen

One screen shows a clear and constant view of the Trainer's screen

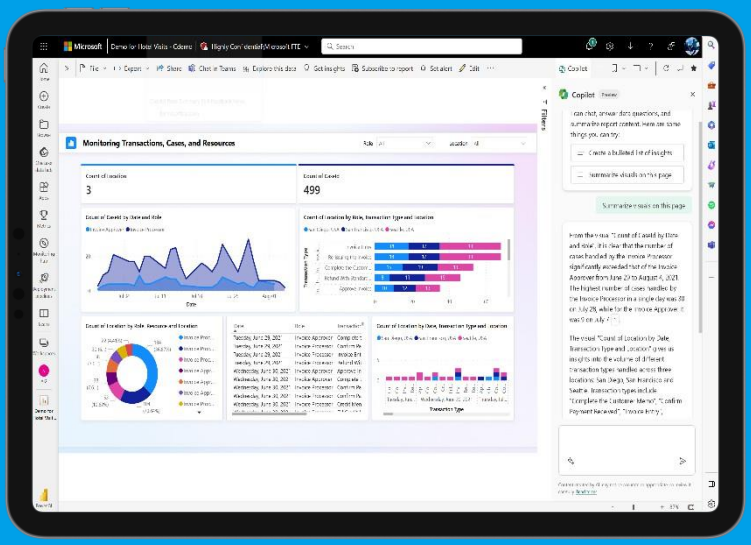


Screen showing your work

Use your second screen to display your work as you follow along through the exercises.

or Join on a 2nd device

If you don't have 2 screens, to constantly display the trainers screen, you can join the Teams meeting on a second device, for example a tablet. You can then use your laptop or PC to do the worked examples as you follow along from the second device.



Why Choose Data Bear?

- Microsoft solutions partner
- Training Focuses on Best Practices
- Step-by-step digital manual provided
- Additional Power BI Helper Files Provided
- Over 50 5 Star Google Reviews
- After Training Support Available

Vertical Focus

We're a Power BI centric company, and a Microsoft solutions partner, with a vertical focus on empowering organisations with Power BI training and solutions that produce results. Our passion is to help organisations become more 'Data Savvy'.

Deep Domain Experience

Having helped numerous organisations overcome the obstacles to enhanced data efficiency and empowering them with the skills to adopt a ‘data culture’, the Data Bear team has many years of ‘real life’ experience in the ‘BI – trenches’. We don't just show you what all the various buttons and knobs do. You can learn that from documentation. Drawing on a wealth of experience, based on developing and deploying numerous best practice BI solutions globally, we'll teach you how to build a robust Power BI solution from the ground up, ensuring that, going forward, your team has the best practice foundation to continue the process of getting the right data into the right hands.

Long-Term Partnership

The process of using Power BI to ensure organisational value is an ongoing learning journey. To ensure your team can overcome any obstacles or issues experienced, we provide a **variety of support packages.** A Power BI support package is a **smart investment** for any company that wants to make the most of their data and achieve their business objectives with Power BI.

Quality

Quality Assurance — as a Gold Microsoft Power BI partner, we have insight to all new Power BI update roll outs and we ensure that all our training content and best practices taught are up to date with latest Microsoft releases and new technology offerings.

Training Locations

United Kingdom We offer regular Training courses in London and throughout the UK.

Remote Online Through live remote online training, we empower organizations globally, regardless of their geographical location.
